

## CASE STUDY

Sky Revolutions Ltd is one of the UK's most authoritative voices in surveying and aerial surveying. They offer exceptional quality land and aerial surveys, photography, filming and inspection services across the Construction & Mining, Facilities Management, Renewables, and Utilities & Telecoms sectors.

### THE CHALLENGE

In 2017 the business has been focusing on building relationships with larger, more established organisations by delivering alternative methods to their current ways of working. To be able develop such relationships many organisations require a detailed preferred supplier application. Although Sky Revolutions already have a lot of the required criteria in place they were in need of a few HR related policies within a tight timeframe to meet an application they were working on.

### THE SOLUTION

As a result of a free consultation meeting that took place between aspire cambridge and the Managing Director at Sky Revolutions Ltd, it was agreed that aspire cambridge would deliver the following;

- A number of branded, tailored policies to meet the requirements of the supplier application.
- Provide the policies within a 48 hour timeframe.

### THE OUTCOME

- Sky Revolutions were successfully accepted on to the clients preferred supplier list

**We found aspire cambridge Ltd to be extremely helpful, flexible and efficient. They provided the policies we needed in a matter of days and were professional and thorough at all times - all at a reasonable cost too!**
